

FRANZIS ELECTRONIC KITS – LEARN MORE ABOUT ELECTRONICS!

# FRANZIS

2023 NOVELTIES

Learn more about electronics. FRANZIS Electronic Kits are the best way to tap into the exciting world of electronics. The unique FRANZIS kits provide hours of fun for everyone from beginners to professionals. Each FRANZIS kit comes complete with all necessary components and detailed assembly instructions:

- All electronics kits have been developed by experts – refined to maximise functionality and didactics
- By quickly experiencing success electronics enthusiasts gain greater confidence in their own technical abilities
- FRANZIS supplies „Quality Time“ for the whole family - time to play, explore and discover
- Designed to give children and adults an understanding of technology through playful experiments
- Many FRANZIS kits are unique and often without equal
- FRANZIS provides endconsumer support with „Lifetime“ guarantee
- All items come in attractive gift boxes
- **New products available in the course of September/October 2023!**

**NEW Art. No. 504132 – Franzis: Porsche Carrera RS „Build Your Legend“**

Motorsport has played a major role in the Porsche legend from the very beginning. The lightweight racing cars from Porsche became technology and design icons. The Carrera RS with its typical ducktail was the first top model of the „Eleven“ and still causes a lot of heart palpitations among Porsche enthusiasts today. In 18 steps, you plug and screw a high-quality Porsche experience around a white model version of the Porsche 911 Carrera RS 2.7 in 1:24 scale. A large-format, 72-page manual outlines the development of the Porsche Carrera RS into a milestone in the history of the Porsche 911.

Box contents: detailed model of the Porsche 911 Carrera RS 2.7 in white with green lettering (kit with 10 parts, scale 1:24), high-quality plastic base with sound module and LED showroom lighting for plugging and screwing (at the push of a button, the engine sound starts and the model is staged with lighting). Age: 14+  
 WS: € 59.99 / RRP: € 119.00

**NEW Art. No. 504234 – Franzis: Ford Mustang V8 Engine**

A star is born! Series production of the first generation of the Ford Mustang began in 1964. Since then, the “Pony Car” has become the epitome of the American sports car. What made this legendary automobile with its emblematic running horse on the radiator grille so distinctively charming was its sporty image combined with high-performing, reliable technology under the hood. Build a transparent, functional model of the formidable V8 engine from the 1965 Ford Mustang. The enhanced 289 K-Code V8 High Performance engine produced a captivating 271 HP at 6,000 revolutions per minute, and a maximum torque of 321 lb-ft (423 Newton meters) at 3,400 rpm.

The assembly kit uses a scale of around 1:4 and contains approximately 200 individual pieces. In two to three hours, you'll build a finely detailed, transparent Ford Mustang 289 K-Code V8 model engine with original motor sound – now also with coloured components like the real vehicle. All of the model parts move exactly as they do on the original, life-size model. The components fit together easily, either as interlocking pieces or with screws – no glue required. The Ford Mustang kit comes with an exclusive 100-page booklet, complete with top-notch details and numerous stunning illustrations that guide you through the history of the Ford Mustang while outlining the technology that lies under the hood. The handbook contains a detailed and generously illustrated step-by-step guide that will lead you through the construction of the engine kit with clear instructions. Additionally required: 3 x 1.5 V batteries (AA). Age: 14+  
 WS: € 107.03 / RRP: € 199.00
